Nationality	British

Software Engineer / Director : Lemonrock Gig Guide (2000 - 2021)

Created, coded and managed live music website [Lemonrock](http://www.lemonrock.com), www.lemonrock.com.

Lemonrock is a responsive PWA app written in PHP 7, JavaScript, MySQL, CSS and AJAX.

The site integrates with many other platforms, including Google Maps and [Stripe](#).

Experience

I'm an experienced software engineer, programmer, web designer, electronics engineer, qualified teacher, and problem solver. I have designed and coded for real-time embedded systems in electronic point-of-sale (EPOS), mobile telecoms and financial services.

My most recent experience is building websites from scratch for online businesses, including my own site, Lemonrock, which was created out of a passion for going to live music gigs. I have designed and used many software test systems for embedded and web systems. I possess expert-level documentation skills for all types of software systems.

Interests

Live music, recording, acoustic guitar, bass guitar, harmony singing, cooking, food, real ale, wine, walking, genealogy, Spanish, record collecting. Musical tastes range from melodic pop/rock (Fleetwood Mac, Tom Petty, Semisonic) through crossover genres (ELO, Pekka, 10cc) to British singer/songwriters (Birdy, Kate Bush, Jodie May) and many others in between.

University Education

B.Sc. (Hons) Computing and Electronics

University of Durham

Certificate in Education (FE)

Middlesex Polytechnic
